FOR IMMEDIATE RELEASE

November 29, 2021

(Lincolnton-) Lincoln County Register of Deeds, in partnership with the current software vendor Courthouse Computer Systems, is now providing a Fraud Detection Notification service to the property owners of Lincoln County. Registered users will be alerted via email when any transactions are recorded in the Register of Deeds office matching the name(s) enrolled with the free service.

"In this day and age of identity theft and online fraudulent activity, I believe our Fraud Detection Notification system will give our property owners an extra layer of security when it comes to protecting the ownership of what may easily be their most valuable asset, Hester announced. I am very pleased and thankful that the county provided me the funds to purchase this service and most of all make it free to the citizens of Lincoln County. I strive to provide the most modern technology but also concentrate on the security of these services".

To enroll in this service at no cost, simply access the Lincoln County Register of Deeds website (www.lincolnrod.com) and click on "Fraud Detection Notification." The site asks citizens to enter their name and email and up to five names for the system to monitor for document filings.

For more information about the Fraud Detection Notification System, contact Danny R. Hester or any staff member at 704-736-8530.
